**Hear what students and teachers have to say about their Empowering Girls’ Voices experience!**

“I absolutely loved learning about topics I am passionate about with girls from across the country who feel the same way. The environment was so welcoming, fun, and collaborative, even over zoom. I cannot even express how grateful I am for this experience.”

– Student, Sacred Heart Greenwich (CT)

“The most impactful thing about the Empowering Female Voices Program was that it shaped me to be more confident and to ask myself “What can I do?” instead of “Wow, I wish there was something I can do.” I felt more empowered and more confident as we did each session.”

– Student, Irma Lerma Rangel Young Women’s Leadership School (TX)

“I have already recommended it as an effective program for learning more about government and providing students a voice. It was important for our community to have a third party, non-partisan organization facilitate political discussions.”

– Teacher, Woodlands Academy (IL)

“The fact that this program was exclusively for the young women in this country made these past few weeks beyond remarkable. Without this program, I would have never known how many talented and powerful girls we have in this nation. I made so many friends from this program and learned that there are people out there who think like me and not like me.”

– Student, Miss Porter’s School (CT)

“This program has inspired me to continue taking action at a local level! I plan to bring what I learned and the resources I’ve been given to clubs and groups at my school. This program was also a needed reminder that though I can’t vote, there are many ways to get involved.”

– Student, Miss Porter’s School (CT)

“The collaboration between students from different schools was such an important learning experience! It was such a fun way to increase engagement on serious issues.”

– Teacher, Hockaday (TX)
