Join Us at the Global Forum

Nearly 300 educators, researchers, authors, and advocates for girls and young women from all over the world will share their insights, expertise, and advice in dynamic and engaging breakout and INSPIRE! sessions during the Global Forum on Girls' Education® III, taking place virtually June 21-22 and in Boston June 27-29. In-person session titles and presenters have been added to our website, with more information being added every day.

Attendees also will hear presentations and findings from the teacher-researcher fellows of the Global Action Research Collaborative on Girls' Education, the world’s first action research program that engages girls’ school educators from around the world in collaborative, disciplined, and sustained action research.

Early Bird pricing is still available on registrations made before April 18. Add your name to the attendee list today!

Now Streaming: Girls as Community Builders

Episode 7 of our On Educating Girls podcast is now available. Dr. Beth Reaves, President of The Washington School for Girls in Washington, DC, and Joey Adams, an alum of the school who serves as the Manager of Graduate Success and Outreach, join host Trudy Hall in a conversation about “belonging” and how to partner with girls as they build the skill set to engage with a new community to make it their own in ways that feel satisfying and authentic. This is a great episode to share with the educators and parents in your community.

Member schools are invited to embed the On Educating Girls podcast channel on their websites as a resource for current and prospective families. Contact Kathleen Osborne for details.

Dozens of faculty, staff, and administrator positions are now open to great candidates around the world. These postings are offered as a complimentary benefit of membership, and the list is continually updated.

Coalition Poll: What Would You Research?

In developing their Research Topics on the theme of Building Problem-Solving Capacity, Confidence, and Skills in Girls, the Global Action Research Collaborative on Girls' Education 2021-2022 Fellows (who will be presenting their research findings at the Global Forum this June) considered the following prompt: Problem-solving with both understanding and confidence is a vital skill in the toolbox of girls today and the women of tomorrow, yet international studies show girls are more reluctant to engage in problem-solving activities than boys. How do we as educators create environments in our classrooms, clubs, sports teams, and advisory groups for girls to foster a willingness to confidently embrace all aspects of problem-solving: the comfortable and the uncomfortable?

When it comes to conducting action research at girls' schools, there are endless possibilities for educators to examine. If you were to launch an action research project at your school today, what would you study and why? Share your thoughts in this month's Coalition Poll.
